PROFILE

An experienced developer in React, AWS, SQL, NoSQL and blockchain technologies, I am passionate about creating innovative products that bring real value to people's lives. Loves to talk about decentralization and web3 community growth, react native and web ML. Big fan of AI and productivity.

SKILLS

- Reactjs, React Native, Next.js
- AWS
- Solidity, Ethereum, Solana
- PostgreSql, MySql
- NodeJs
- DynamoDB, MongoDB, Firebase
- E2E testing, Unit testing
- Python Selenium, Puppeteer
- Paypal, Stripe

PROJECTS

WEB3HUB

A platform for community growth, jobs and projects in web3. The goal of this platform is to bring people into web3 space and expand the potential of this technology. The app is built using AWS amplify with react on the frontend, auth is done via crypto wallets including: metamask, phantom and coinbase. API was initially graphql with dynamodb, but later we transferred to Rest API with PostgreSQL and currently transitioning to dynamoDB single table design to achieve both great performance and flexibility at the same time. **Link to website**

SBT COLLECT

Platform for advertising sbt collections. Sbt standard didn't come out yet but essentially this platform is rarity tools for sbt token standard with metaverse vibe to it. App was built using aws amplify with graphql API and dynamodb, listing payments are done via metamask and stored on the payments smart contract. **Link to website**

STEPUPSAVE

Mobile app that promotes healthy habits where users get blockchain token rewards stored on EOS blockchain that can be later redeemed in partner stores to get discounts on products they want to buy. App was built using react native, node.js and EOS blockchain and website(landing page) is built using next.js. **Link to website**

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY

University Of Novi Sad

2022-Present

SECONDARY SCHOOL

Computer Science

2017-2022
