SKILLS

- Reactjs, Typescript, Next.js
- React Native, Expo, EAS, Expo router
- AWS (Cognito, amplify, lambda, S3, RDS, DynamoDB, SES, Step functions)
- NodeJs, Express.js, Koa.js
- PostgreSql, MySql
- DynamoDB, MongoDB, Firebase
- Paypal, Stripe
- Solidity, Ethereum
- E2E testing, Unit testing
- Python Selenium, Puppeteer

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY

University Of Novi Sad

2022-Present

SECONDARY SCHOOL

Computer Science

2017-2022

PROFILE

- Experience with freelance mobile and web apps (over 4 years).
- Tech lead at Google developer student club (Novi Sad)
- **Udemy** instructor and React native **YouTube** channel
- Real-world startup experience (Raising starts startup accelerator)
- Featured by Google Web AI lead for reinforcement learning project (**Dino chrome game AI**)

PROJECTS

WE NEED A PLAYER

Mobile app that allows users to find people to play sports with. First 500 users in 2 days! The user can create an appointment, join appointments that other users created, reject or accept users from joining, create and update their profile and appointment info. There is also a full pagination setup that allows user to filter appointments by sport type, venue type, distance from the user's address, price and other criteria. Users can also chat in the app and create teams as well where they can call team members to join created appointments. Supports dark mode. Admin panel created with react.js that allows the app admin to ban/unban users. Created with react native, expo router, aws amplify (S3 for storage, typescript express.js rest api, postgresql database, aws cognito for auth, step functions), jest and react native testing library for unit tests and expo push notifications. **Link**

STEPUPSAVE

Mobile app that collects user's steps and based of the amount of steps user has walked, he gets X amount of tokens that can later be exchanged for discounts in partner stores. In app you can view your statisics, purchases you made and available discounts. Partner stores include sports equipment stores, supplement stores, clothing, shoes, gyms...

This project was supported by raising starts startup accelerator. App isn't out yet, since we are currently talking to potential partners, but the website is live: **Link**
